Dedicated MEAN stack developer with hands-on experience in front-end and back-end development. Expertise in crafting dynamic, user-centric applications with a keen eye for design. Strong communication skills demonstrated through public speaking and event anchoring, delivering clear, engaging presentations. Eager to contribute technical knowledge and creative solutions in a collaborative environment.

Professional Experience

Projects

- **E-commerce Website (Node.js, Express, MongoDB)** 💡
 - Developed a full-stack supermarket website with separate user and admin functionality, including product management, order tracking, and shopping cart features.
- **MEAN Stack CRUD Application** 💡
 - Designed and built a CRUD application for efficient data management.
- **Netflix Replica (Angular 18)** 💡
 - Created a Netflix-like application with dynamic content rendering and real-time data fetching using Angular. Implemented Google authentication for secure user login and account management.
- **Task Management System (TypeScript, Node.js)** 💡
 - Built a task management system using TypeScript with full CRUD functionality and RESTful APIs.

Other

- **Freelance Graphic Designer** Self-employed | 2021 - Present
 - Created custom graphic designs for various clients using Adobe Photoshop and Illustrator.
 - Worked on branding, marketing materials, and UI/UX for small businesses and personal projects.
- **Public Speaker & Master of Ceremonies (MC)** Various Events | 2020 - Present
 - Delivered speeches and presentations on various topics including technology, self-improvement, and youth empowerment.
 - Acted as the Master of Ceremonies for 4 events, managing program flow and audience engagement.
